Guide		Comments
I	Are the results valid?	
1	Was the sample of patients' representative?	
2	Were patients sufficiently homogeneous with respect to prognostic risk?	
3	Was follow-up complete?	
4	Were objective and unbiased outcome criteria used?	
II	What are the results?	
1	How likely are the outcomes over time?	
2	How precise are the estimates of likelihood	
III	How can I apply the results to my patient care?	
1	Were the study patients and their management similar to my own?	
2	Was the follow-up sufficiently long	
3	Can I use the results in managing patients in my practice?
