

CRITICAL REVIEW FORM: PROGNOSIS UNIT-ANSWERS**Citation:**

Kilgannon JH, Jones AE, Shapiro NI, Angelos MG, Milcarek B, Hunter K, Parrillo JE, Trzeciak S; Emergency Medicine Shock Research Network (EMShockNet) Investigators. . Association between arterial hyperoxia following resuscitation from cardiac arrest and in-hospital mortality. *JAMA* 2010 303(21):2165-71.

Guide	Comments
I	Are the results valid?
1	Was the sample of patients representative?
2	Were the patients sufficiently homogenous with respect to prognostic risk?
3	Was follow-up sufficiently complete?
4	Were outcome criteria objective and unbiased?
II	What were the results?
1	How likely are the outcomes over time?
2	How precise are the estimates of likelihood?

III	Will the results help me in caring for my patients/How can I apply the results to patient care?	
1	Were the study patients and their management similar to those in my practice?	
2	Was follow-up sufficiently long?	
3	Can I use the results in the management of patients in my practice?
