

CRITICAL REVIEW FORM: CLINICAL PRACTICE GUIDELINES

Citation: Kahn S, Lim W, Dunn A, Cushman M, Dentali F, Akl E, Cook D, Balekian AA, Klein RC, Le H, Shulman S, Murad MH. Prevention of Venous Thromboembolism in Non-Surgical Patients: Antithrombotic Therapy and Prevention of Thrombosis Guidelines, 9th Edition, American College of Chest Physicians. Chest 2012;141(2):e195S-e226S.

GUIDE		COMMENTS
1	Are the intervention and comparator clear? Were all outcomes important to patients considered?	
2	Was the recommendation based on the best current evidence?	
3	Is there an appropriate specification of values associated with each of the outcomes?	
4	Do the authors indicate the strength of their recommendations?	
5	Is the evidence supporting the recommendations easily understood and is it consistent with the recommendations?	
6	Was the influence of conflicts of interest minimized?
